DETAILED ACTION

Specie Election

Claims 1-10 are generic to a plurality of disclosed patentably distinct species comprising (a) formula I compounds; (b) diseases or "indications".

These claims encompass species that are so diverse and unrelated structurally that a reference anticipating one of the species would not anticipate or render obvious the other species. Thus, the stated species are capable of supporting separate patents. To illustrate this diversity, consider the following. The many different structures encompassed by the generic formula I can be classified in many different subclasses of class 514: 247, 277, 228.8, 222.2, 255, 256, 359, 381, 385, 408 are just a few of these subclasses. Therefore, the diversity of species in claims 1-10 requires a search of many different subclasses, 247, 277, 228.8, 222.2, 255, 256, 359, 381, 385, 408, etc., which constitutes an undue burden to the office. Applicant is advised that the response to this requirement must include an identification of the species that is consonant with the requirement set forth in 35 U.S.C. 121 as well as a listing of all claims readable thereon.

Applicant is required to elect a single specie of Het and a single Y for examination purposes. The SPECIE is a compound wherein all of the substituents are particularly named.

The claims also include a variety of different diseases. Note that no particular disease is set forth in the claims. Claims 1-10 are thus generic to a plurality of diseases ("indications"). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. The treatment of each "indication" represents a separate field of medical technology having a separate field of search. The search for treatment of all "indications

of the invention" is therefore an undue burden on the office. Note that the search is not limited to patent files.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that in order for the reply to this requirement to be complete it must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Because the above specie election requirement is complex, a telephone call to the applicant's agent to request an oral election was not made. See M.P.E.P. Sec 812.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mojdeh Bahar whose telephone number is (703) 305-1007. The examiner can normally be reached on (703) 305-1007 from Monday, Tuesday, Thursday and Friday from 8:30 a.m. to 6:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan, can be reached on (703) 305-1877. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
